At Virgo, quality is of utmost importance and we maintain the same in all the business heads of ours. We never compromise on quality and that is why we are recognized as indisputable leaders of laminate, plywood, MDF, aluminum, PVC and ACP. Apart from our adherence to quality, our 32 years long experience trail helps us deliver unmatched products to our customer. Be it laminate, plywood or aluminum products, for us, customers satisfaction is a barometer of our progress. In fact, we also focus on the overall development of society by favouring sustainable development. We are equivalently concerned about the environment, so we produce eco-friendly products that do not harm nature. We always stick to our ethos, value system, and professionalism that fuel our spirit to serve the finest quality products. This is applicable in each and every stage of the manufacturing process. Right from picking up the raw materials to serving the final product, we observe all the standards of quality and safety due to which, today, we have earned the market recognition of highest producer and exporter of laminates. We aspire to hold this position for many more years to come by keeping on innovating and serving exactly the right products.

VIRGO ALFA FR grade is used to create firewall to protect the houses, high rise buildings, hospitals, airports etc. A2 grade has fireproof properties like metals.

PANEL COMPOSITION

Recommended Fabrication Specification

- Aluminium section should be used in 2' X 2' standard size
- Ideal panel size should be used in 2' X 2' standard size

Colour may vary from batch to batch ΔE5

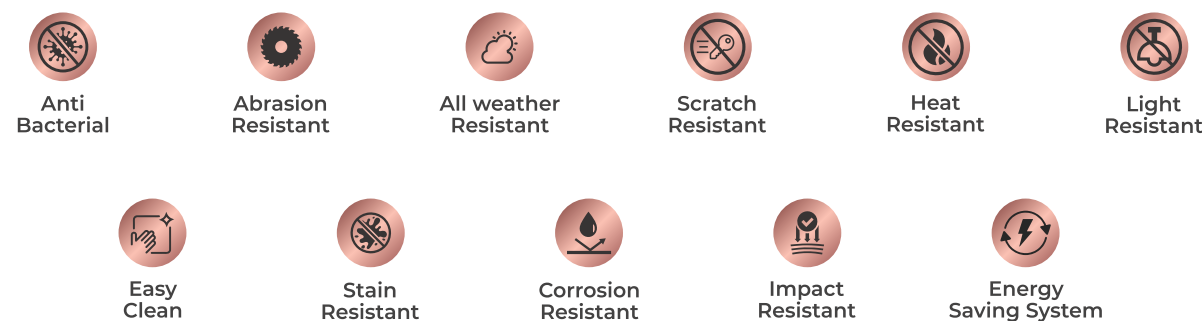

Note: Virgo Premium Grade aluminium composite panels as per fire classification EN-13501 Class-B1 is also available. It is recommended to clean the panel minimum 2 times in a year for better performance of ACP. The cleaning agent Ph should be 6 to 8 and the panel cleaning done below 30° C temperature.

Note: ACP expand with temperature changes - about 2.4 mm/m per 30°C. To prevent deformation and maintain performance, allow for movement using slotted holes, flexible fixings, and expansion joints, especially in varying climates.
